EXECUTIVE SUMMARY

- Purpose of this project is to start manufacturing of “Dragon Fruit”.
- Navalam fruits is a start-up grower and distributor of exotic Dragon Fruit for restaurants and individual consumers.
- The firm is a combination of cutting edge, highest quality, and efficient food technology and production. It is committed to the improvement of food taste and nutritional quality. It has being founded to build upon an extensive array of biological and horticultural education, experience, and the research of its founders.
- The plan developed is as per 30 years since the life time of the dragon fruit plant .
- The health and vitamin industry is growing at a very quick pace. Customers want to have natural and plant alternatives to medication. They don't want to pollute it with chemicals.
- Dragon fruit is rich in antioxidants like flavonoids, phenolic acid, and betacyanin. It's naturally fat-free and high in fiber. It may help lower your blood sugar. It can strengthen your immune system.

OBJECTIVES

- To become leading producer of Dragon fruit.
- To increase our production capacity exponentially, which results in decreased India's dependence on the import of Dragon Fruit.
- To reach at point of sustainable profitability.
- To give access to right of knowledge to our farming.
- To create healthy eco system.
- To help you live towards healthier living .
- To create jobs and sustain local economy.
- To preserve culture of agriculture .
- To promote and fund raise for corporate social responsibility as well as nations interest.
- To support in research and development .

MISSION

- Navalam fruit's mission is to provide high quality, nutritional, and flavorful dragon fruit (kalamam) for consumption in regions of India.
- Increase India's variable production of Dragon fruit
- Additionally the company will provide high quality planting materials for use nationwide in future.

VISION

"To be the most respected and successful enterprise and delight customers with organic cultivation of dragon fruits."

- To produce organic healthy quality fruits and develop trust and loyalty from customers through sustained efforts at maintaining world class standards, for organic agriculture.

DRAGON FRUIT (KAMALAM)

- Dragon fruit grows on the Hylocereus cactus, also known as the Honolulu queen, whose flowers only open at night.
- The plant is native to southern Mexico and Central America. Today, it is grown all over the world.
- It goes by many names, including pitaya, pitahaya, and strawberry pear.
- Dragon fruit contains small amounts of several nutrients. It's also a decent source of iron, magnesium, and fibre.
- One of the study compared the antioxidant properties of 17 tropical fruits and berries.
- It has many advantages including low-water and nutrient requirements relatively less resource for establishing orchards and its maintenance, multiple harvest of fruit in a year ; potential to sustain high yield up to 20 years high benefit to cost ratio and high nutraceuticals and functional properties.

How Long Does Dragon Fruit Bear Fruit?

PRELIMINARY INVESTIGATION

- Being a native of Southern Mexico and Costa Rica dragon Fruit was introduced during 1994 for its commercial cultivation In South Asian tropical countries at present significant production
- The expansion of fruit is occurring in Many countries like Vietnam, China, Mexico, Colombia, Thailand, Malaysia, Indonesia and United States.
- Three major countries which is Vietnam , China and Indonesia Contribute more than 93% of dragon fruit production.
- World – share of Vietnam alone is More than 51% Recent estimate so that the demand for Dragon fruit is growing consistently all over the world according to Dragon fruit.net.vn website.
- Asia has the largest numbers of consumer for dragon fruit

Table 1. Major dragon fruit producing countries (area, production and productivity, 2017–2018)

Country	Production area (ha)	Production (MT)	Productivity (MT ha ⁻¹)
Vietnam	55,419	10,74,242	22–35
China	40,000	7,00,000	17.5
Indonesia	8,491	2,21,832	23.6
Thailand	3,482	26,000	7.5
Taiwan	2,490.6	49,108	19.7
Malaysia	680	7,820	11.5
Philippines	485	6,062.5	10–15
Cambodia	440	4,840	11.0
India	400	4,200	8.0–10.5
USA	324	5,832	18.0
Australia	40	740	18.5
South Africa	12	100	8.3
Total	1,12,264	21,00,777	-

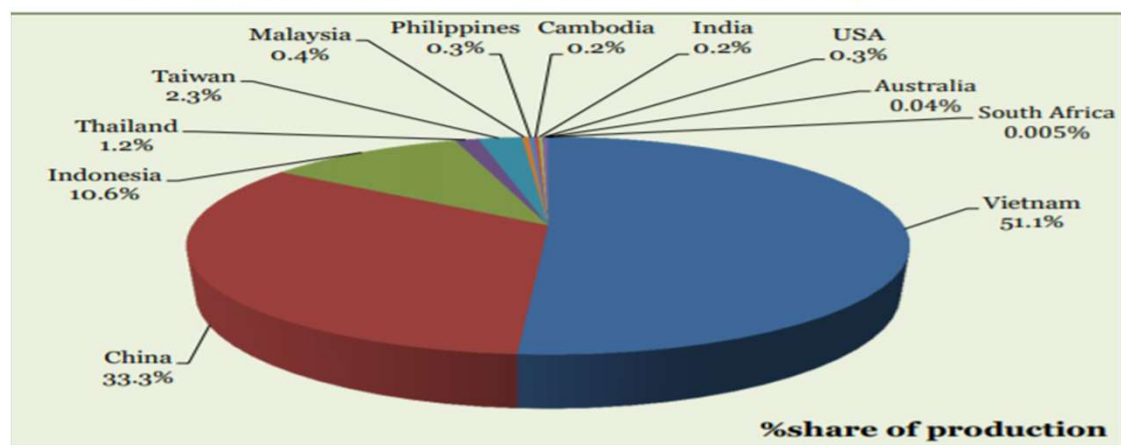

Fig. 2. Global dragon fruit production (% share country wise)

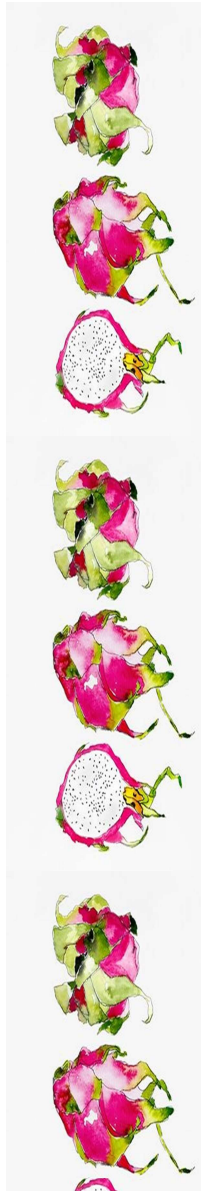

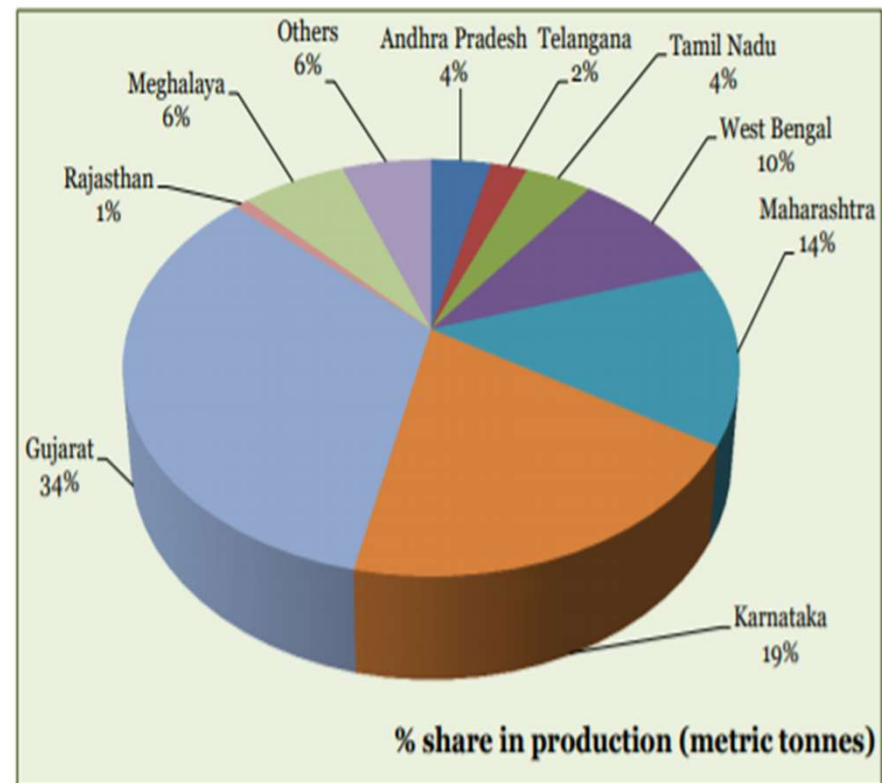

INDIA

- In India, dragon fruit was introduced during the late 1990s
- Thereafter, area under its cultivation was gradually increased from 4 to 400 ha in different states during 2005–2017
- Initially cultivation of dragon fruit was started by the farmers from Karnataka, Maharashtra, Gujarat, Kerala, Tamil Nadu, Orissa, West Bengal, Andhra Pradesh, Telangana and Andaman & Nicobar Islands.
- Gujarat, Karnataka and Maharashtra are the leading producers contributing about 70% of India's dragon fruit production.
- The water scarce areas of Kutch in Gujarat, Northern Karnataka and Western Maharashtra are major dragon fruit growing regions of the country.
- Currently India is importing 95% Dragon Fruit from Vietnam, Thailand, etc.
- In future also it's demand and awareness likely to increase mainly due to its taste, nutritional and medicinal properties.

- Year wise estimated land under cultivation

Years	Area (ha) under cultivation
1990	Introduced in India (0.5)
2005	4.0
2010	12.0
2012	15.0
2014	35.0
2017	400.0
2020	3,085.0 [#]

- Estimated production of Dragon fruit

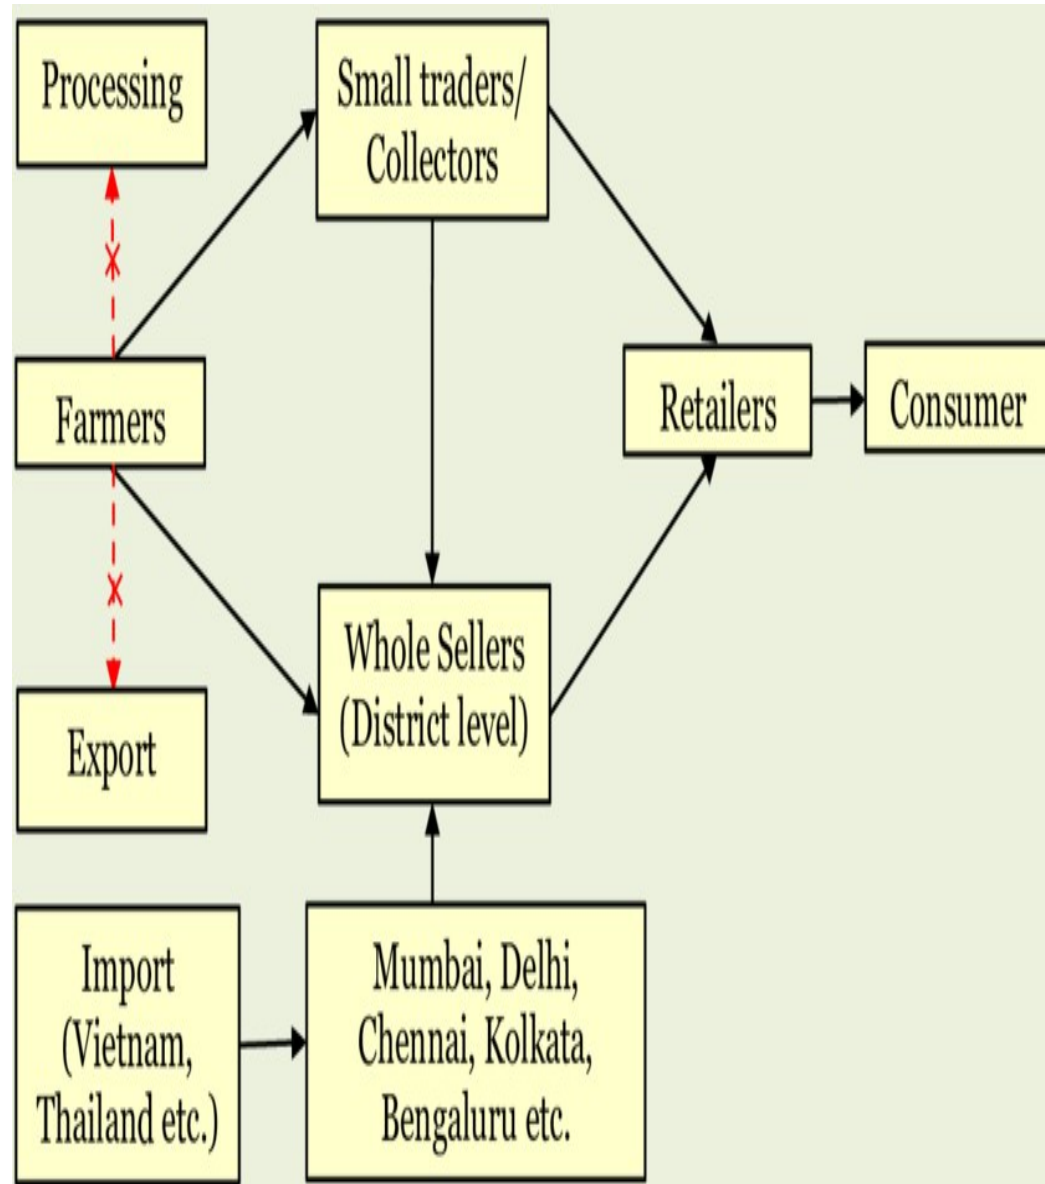

MARKETING PLAN

- As far as marketability is concerned, there is assured market of dragon fruit in India at present and expected to reach greater peak because of limited number of commercial producers and high demand.
- There isn't any age group boundaries.
- Different Medias to draw the attention of the consumer like:

Collaboration with

- Tie-ups with reliance mart , D-Mart and Big basket which provides fresh groceries
- India mart
- Indigenous retail digital Selling apps
- ICE-CREAM companies
- Shakes , juices manufacturer
- Restaurants
- Traditional marts, etc

Product:

Dragon Fruit

- It is exotic fruit with mixture of nutrition.
- Product is the key element in the marketing offering .
- Our marketing mix planning begins with formulating an offering that brings value to the target market.
- This offering becomes the basis upon which the company builds profitable relationship with customer.

Price:

- Pricing is one of the major component of a full business plan.
- We selected the price for our product Dragon Fruit by considering various things like, price assigned by other manufacturer, whether consumer will purchase it, maintaining line with our marketing strategies and the product attributes etc.
- Market value
1kg dragon fruit = Rs 350/-
- For viability of project we have taken price estimation though it will be sold at par of market rate
1kg of Dragon fruit = Rs 100/-

Promotion:

- Every company takes necessary steps to sell their product in the market, even though our product is highly enriched but without any sales promotion activities or strategy, we can't get a good response from consumer.
- Our prior strategy will be sell high quality product in a competitive price to the customers.

PROMOTIONS

- Press Advertisement (News paper & Magazines)
- Television Commercial (National & Cable TVs)
- Radio Advertisement (Bangladesh Radio & Privet radio stations).
- Mobile Campaign (Road shows).
- Sales Promotion (Sampling, Gift and scratch card offer) etc.

Place:

- Dragon fruit grows on cactus plants which love warm, humid climates and needs very little water.
- They are subtropical plants which need at least six hours of sunlight per day.
- They will also grow well in a warm and sunny spot indoors.
- Land of Kutch is exactly resembles the requirement to grow DRAGON FRUIT.

Location of the project – KOTDA ROHA , KUTCH ,GUJRAT.

Strength

- Fertile Land
- Long term relationship with customers
- Low capital requirements
- Ecofriendly
- Availability of resources

Weakness

- Limited production.
- Labor Intensive.
- Absence of organic fertilizer at start-up phase.

S

W

O

T

Opportunity

- Low competition
- High Demand of organic products
- Agro-Bio diversities

Threats

- Weather and Wildlife
- Pests
- Urbanization
- New Competitors and Price Wars
- Theft

PARTNERSHIP FIRM

GOVERNMENT REGULATION

- 8-A form for ownership of agricultural land
- 7-12 form for agricultural land certificate
- Global GAP (good agricultural practices) Certificate
- Driving license for agricultural tractor and power tiller.

REGISTERING PARTNERSHIP FIRM.

Partnership firm to be resisted with
'REGISTRAR OF FIRM'

The application for the Partnership registration form must include the prescribed documents like the Identity proof, address proof, a real copy of the Partnership deed entered into and the proof of the Principal place of business.

- Any of the following documents can be submitted as identity proof and address proofs.
PAN card, Passport, Driver License, Aadhar Card, Voters ID.

Operational plan

- Start – up plan (1 year)
For allocation of capital and plantation of saplings
- 5 year plan
Annual plan for sustainability of the farm
- Post 5 year
Continuity of Dragon fruit cultivation with expansion of sapling nursery

Location

kotda Roha , Kutch , Gujrat, India.
(Area; 15 Acers.)

The operation will utilize:

- One large collection and pack house.
- Horticultural greenhouse.
- Filters, water treatment devices.
- Fertilizer biogas.
- Outdoor fruit facilities.
- Admin building and labor quarters .

HUMAN RESOURCE

Partners

- To participate in supervision
- To expand the business
- To participate in WORLD AGRICULTURE EXPO, INDIAN AGRICULTURE SEMINAR AND EXPO
- To market and promote by handling social media sites

LABOUR

☐ Full time at farm

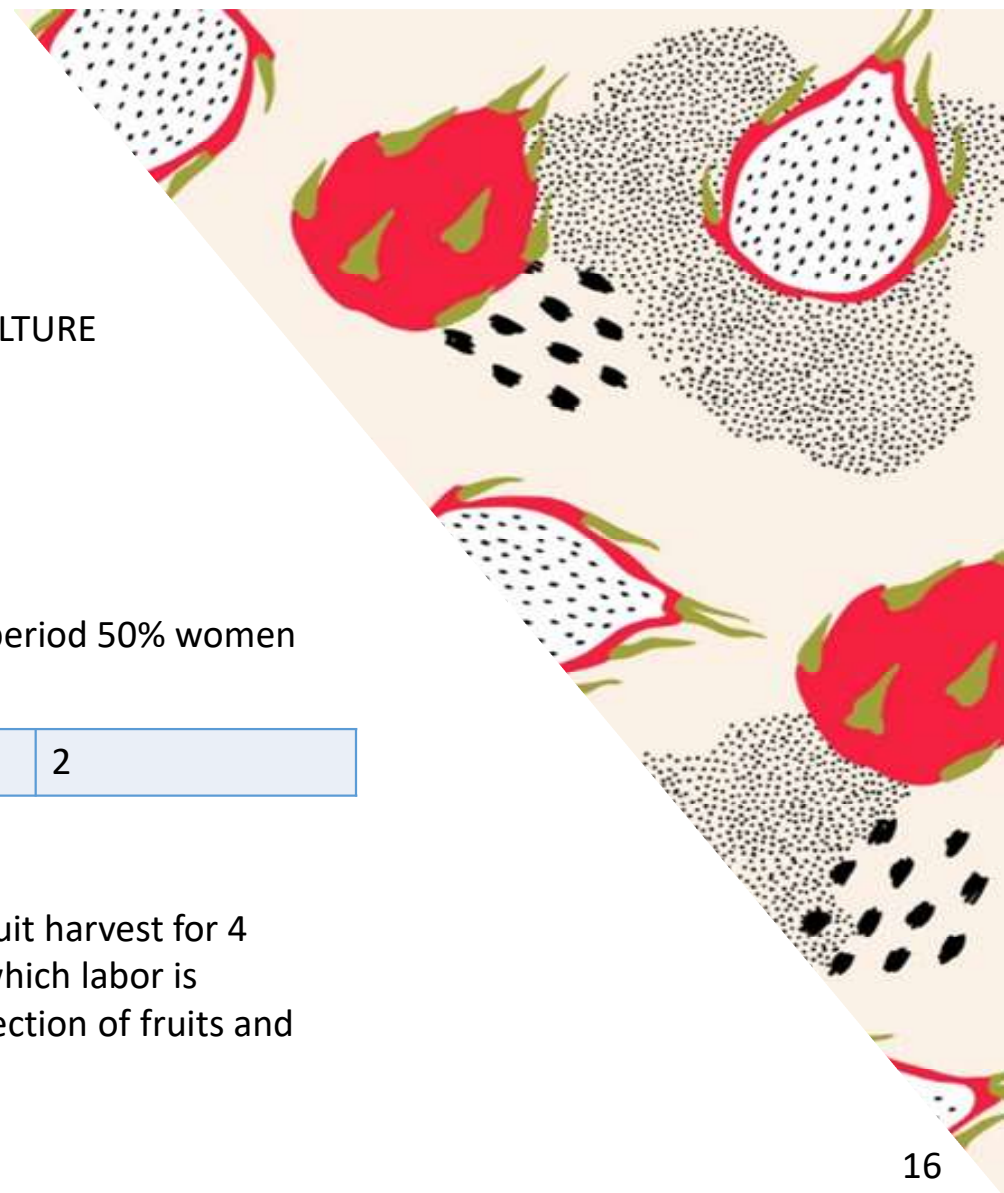

Skilled labour	1
Semi skilled labour	1
Unskilled labour	2

To look after farm
Maintain drip irrigation system
Off jobs of farms
Collection and packaging of fruit
Transportation of fruit to distributors

☐ Harvesting period 50% women

Unskilled labour	2
------------------	---

Indian Dragon fruit harvest for 4 months during which labor is required for collection of fruits and packaging.

Nature and Limitation of Projections

This financial projection is based on sales volume at the levels described in the sales forecast section and presents, to the best of management's knowledge, the company's expected assets, liabilities, capital, and revenues and expenses. The projections reflect management's judgement of the expected conditions and its expected course of action given the hypothetical assumptions.

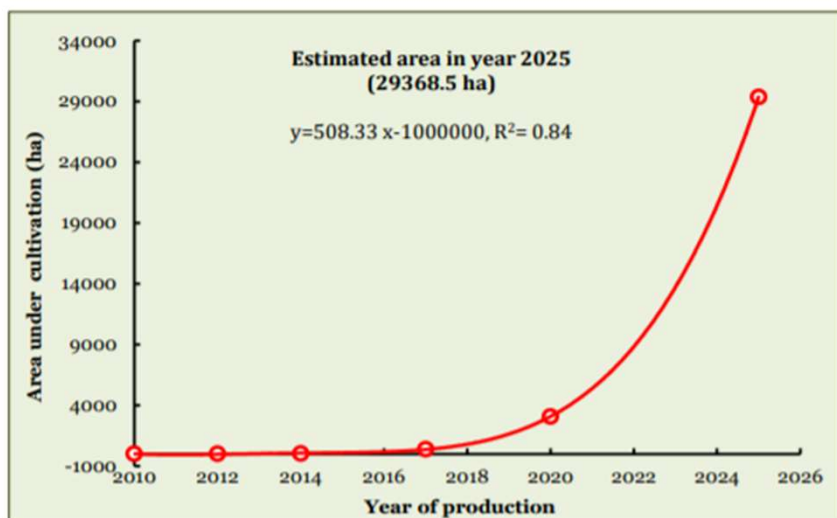

Profit Timeline

FUTURE PLAN

Presently, production of dragon fruit in India is far less than the same imported from Thailand, Malaysia, Vietnam and Sri Lanka etc.

- The aim is to expand the cultivation area down the line and future to export excess Dragon fruit.
- In the meantime, the partnership firm would like to explore the possibilities of nursey for growing of dragon fruit saplings .
- Selling saplings to other dragon fruit cultivators.

Critical risk

- Illegal holding of land
- Untimely climate changes
- Natural calamities such as drought
- Plant sickness
- Pest attack
- Spoilage of goods due to delayed transport or improper handling in storage
- Non repayment of loan

EXIT PLAN

LOSS INCURRED	PROFIT GAINED
Plan A - Selling off complete project.	Plan A- conversion of partnership firm into public limited company.
Plan B - Division of the land and selling it to individual farmers at premium.	Plan B - Acquisition and merger with foreign companies.
Plan C - liquidation of assets to payback liabilities and losses incurred.	
Plan D - Bankruptcy	

The background of the image is a repeating pattern of dragon fruit (pitaya) on a white background. The pattern includes whole dragon fruit with their characteristic red, scaly skin and green, pointed leaves. It also features cross-sections of the fruit, revealing a white interior filled with small, black, oval-shaped seeds. The dragon fruit elements are scattered across the frame, creating a vibrant and textured backdrop.

THANK YOU
